Future of media and child safety in a permanently connected, smartphone, web-infused world.

Video about safety of children online, prepared in response to requests from parents at a local Middle School in the UK who were worried about their own children getting access to damaging material. What should the ground rules be? What is an acceptable position for a parent to take with a child at various ages? How can I protect my child online?

Advice to parents about online safety, child protection in a digital world, teenage access to social networking sites such as Bebo, Facebook, Twitter and youtube. Protecting young people with agreed rules for online access, joint access to e-mail, networking sites, using computers in family public areas at home. Problems with cyberbullying. Privacy online and monitoring history of web browser. Journey together in online activity parents engage ...
